

ROI Calculators

Wellness ROI Calculator, Wellsteps

https://www.wellsteps.com/roi/resources_tools_roi_cal_health.php

This series of ROI calculators estimates the effect of well-designed wellness programs on health care costs, absenteeism, and presenteeism.

Physical Inactivity Calculator, East Carolina University College of Health & Human Performance

<http://www.ecu.edu/picostcalc/costcalculator/coi.asp>

This calculator estimates the cost of medical care, worker's compensation, and lost productivity as a result of physical inactivity.

Obesity Cost Calculator, LeanWorks!, Centers for Disease Control and Prevention

<http://www.cdc.gov/leanworks/costcalculator/index.html>

This calculator estimates medical care and lost productivity costs due to obesity, and can also estimate ROI for interventions to reduce obesity.

RTI Obesity Cost Calculator, National Business Group on Health

<http://www.businessgrouphealth.org/healthtopics/obesitycostcalculator.cfm>

This calculator estimates the direct health care cost impact of obesity as well as some indirect costs due to obesity, and models costs savings from interventions to reduce obesity.

ROI Calculator for Smoking, America's Health Insurance Plans

<http://www.businesscaseroi.org/roi/apps/calculator/calcintro.aspx>

This calculator estimates the cost and utilization of smoking cessation interventions, the number of employees who will quit smoking as a result of the interventions, and the productivity savings and return on investment achieved for the employees who will quit.

Alcohol Cost Calculator, Ensuring Solutions to Alcohol Problems

<http://www.alcoholcostcalculator.org/alcohol/?page=form&employed=1>

This calculator estimates the number of problem drinkers (both employees and dependents) and the medical and social costs due to problem drinking.

Substance Use Disorder Calculator, Ensuring Solutions to Alcohol Problems

<http://www.alcoholcostcalculator.org/sub/?page=form&employed=1>

This calculator estimates the number of substance abusers (both employees and dependents), medical, productivity, and social costs due to substance abuse, and potential savings associated with screening and interventions to reduce substance abuse.

Unintentional Injury Cost Calculator, National Business Group on Health

<http://www.businessgrouphealth.org/injurycostcalculator/>

This calculator estimates medical and productivity loss costs due to unintentional injuries.

Maternal and Child Health Calculator, National Business Group on Health

http://www.businessgrouphealth.org/benefitsttopics/MCH_Calculator.zip

This calculator estimates the direct and indirect costs associated with adopting recommended prevention benefits to support healthy mothers and healthy babies.
